

The Cleveland Cord Blood Center (CCBC)

To request a photo(s), please contact Yopko Penhallurick at jp@yp-pr.com or pa@yp-pr.com or 440-543-8615.

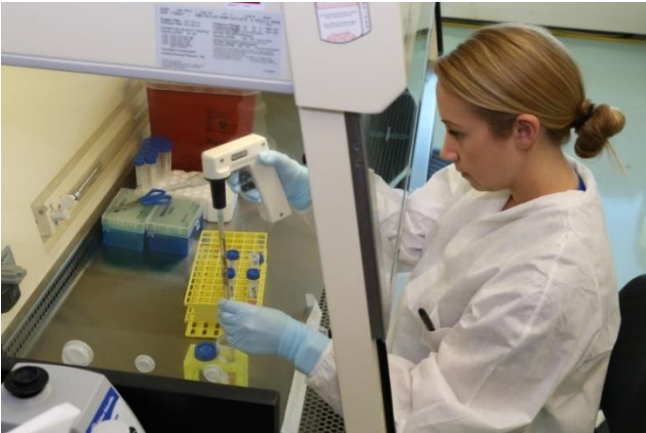

Photo 1: The Cleveland Cord Blood Center collects, processes, stores and distributes stem-cell rich umbilical cord blood for transplantation and research. Units are collected from six collection sites.

Photo 2: Technicians prepare a CCBC cord blood unit for cryopreservation. Since 2008, CCBC has distributed cord blood units in 32 states and 21 countries.

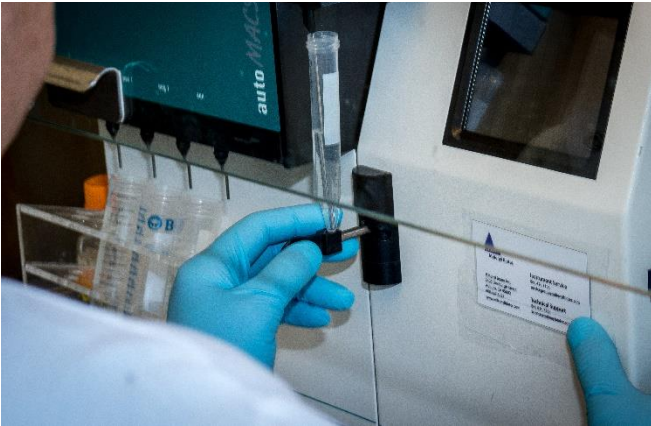

Photo 3: CCBC researchers explore cord blood-derived cells as regenerative cell therapies for diseases such as Parkinson's disease, diabetic retinopathy and wound healing.

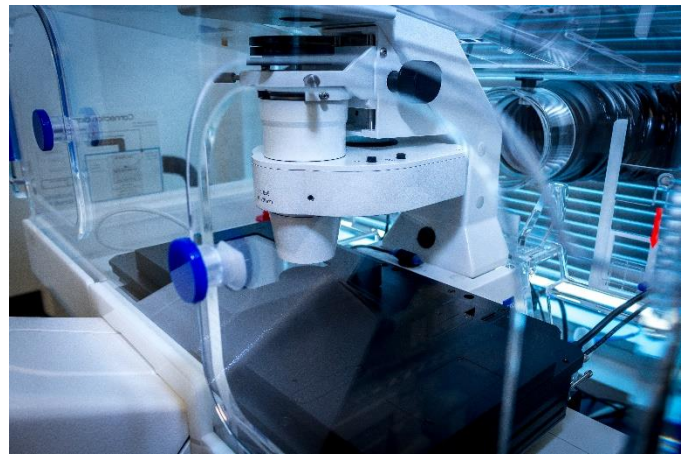

Photo 4: CCBC's Research Lab

Photo 5: Formed in 2018 and launched independently in 2020, the Cell Therapy Institute (CTI) is one of CCBC's two social enterprise subsidiaries.
